

Test Case Execution: Frontend Login Flow

Test Case Execution: Frontend Login Flow

Objective:

Verify that a user can successfully log in through the Lyoko web UI using valid credentials and is redirected to the dashboard. Ensure password complexity and logout/login behavior works as intended.

Preconditions:

An existing user account must be created through the sign-up form before login can be tested.

Test Steps:

1. Navigate to the Lyoko web app.
2. Click on 'Get Started' or 'Create Your Account'.
3. Fill in the form fields:
 - Username: IAMBRYCESONTHEONE
 - Email: soundmoneyissound@gmail.com
 - Password: !MatrixPass12345
4. Click 'Create Account'.
5. After successful account creation, verify the user is redirected to the dashboard.
6. Click the Logout button.
7. Click 'Sign In'.
8. Enter the same credentials used in signup.
9. Click 'Sign In' and verify redirection to dashboard again.

Expected Result:

User can create an account, is redirected to the dashboard, can logout, and log back in

Test Case Execution: Frontend Login Flow

successfully.

Actual Result:

The form accepted valid entries and enforced password complexity.

User is redirected to the dashboard upon successful account creation.

Logging out clears session and returns user to login screen.

Logging back in works with previously created credentials.

Invalid passwords were rejected.

Blank fields were not accepted.

Redirection flow worked as expected.

STATUS: PASSED
